

OVERALL COMPLIANCE

63.6%

4,153 of 6,530 patients within target

TOTAL ER VISITS

6,530

Over 3 months · avg 72/day

CRITICAL SAFETY (ESI 1-2)

100%

1,442 life-threatening cases · 0 breaches

ESI 4 COMPLIANCE

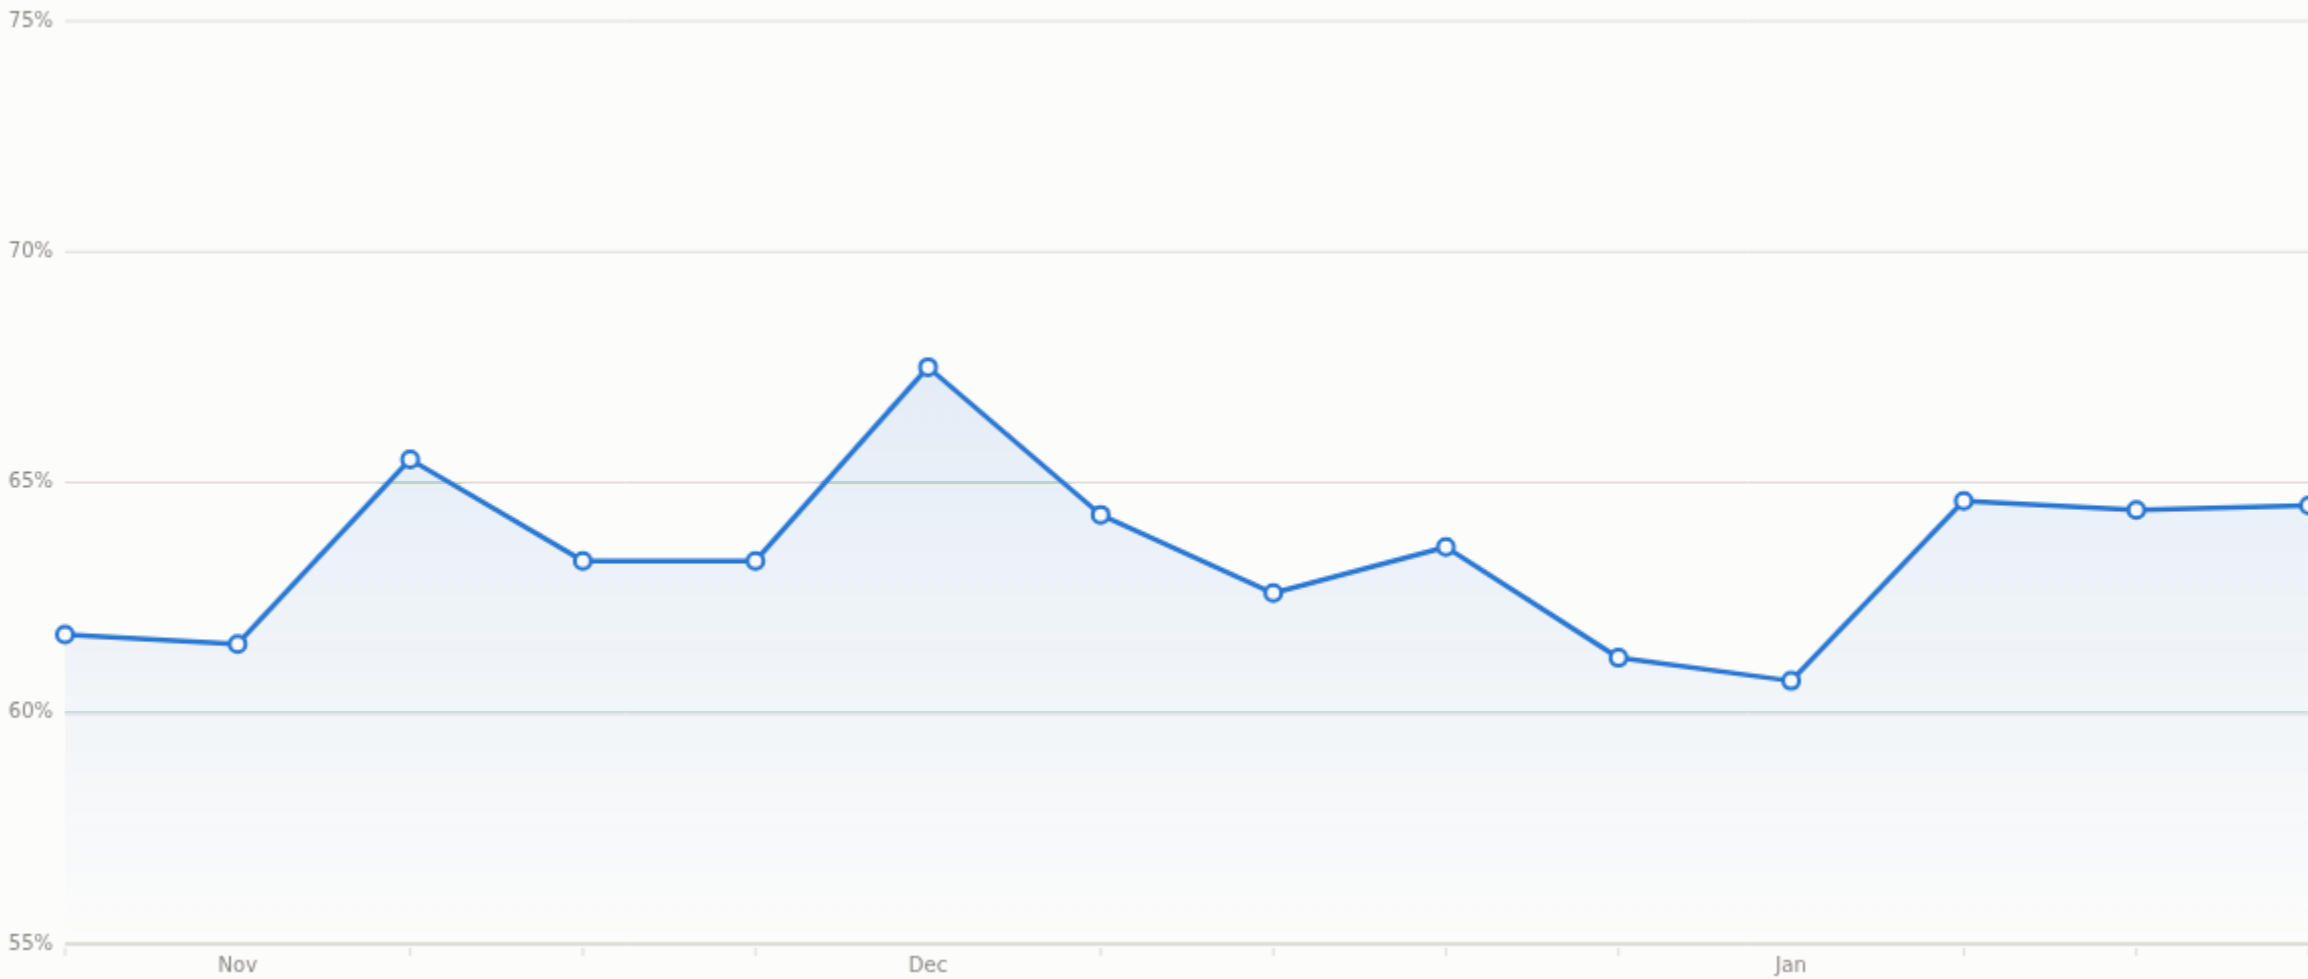

12.1%

1,342 of 1,526 patients waited too long

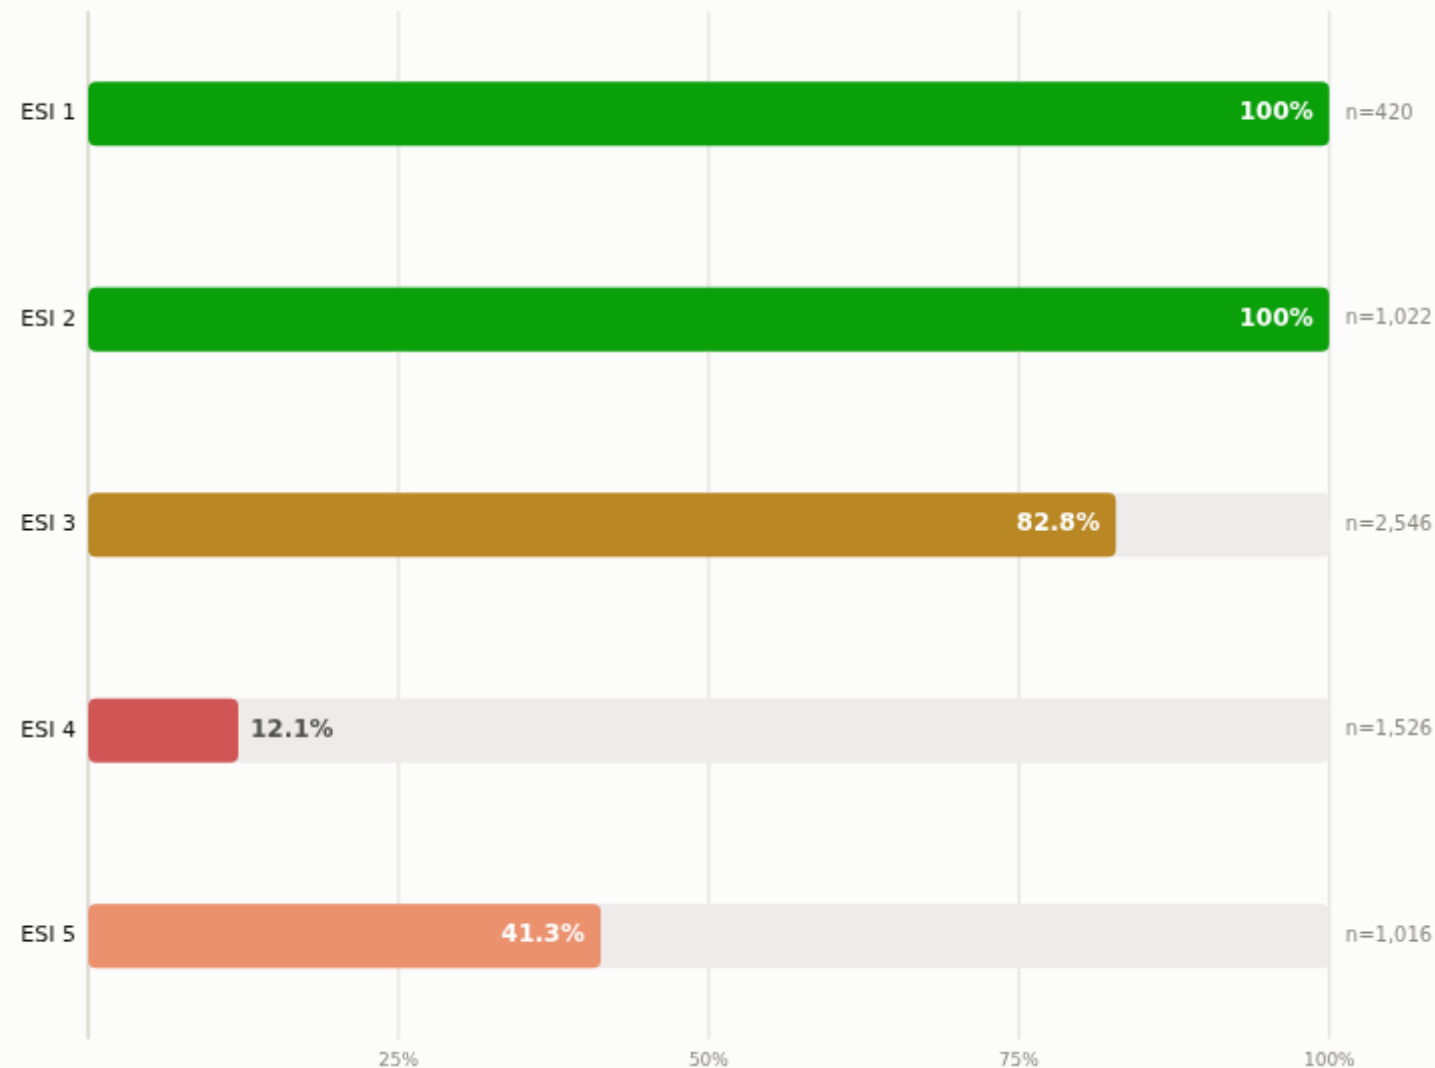

Weekly Compliance Rate Trend

Percentage of patients seen within ESI target time — all severity levels combined

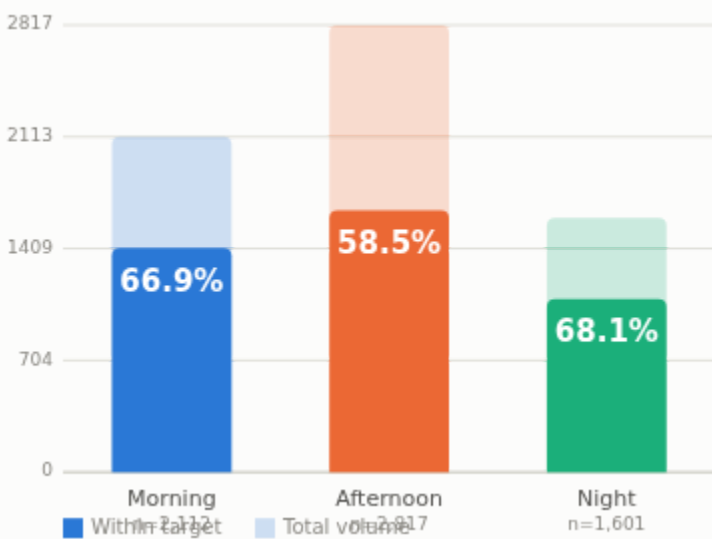

Compliance Rate by ESI Triage Level

Performance against target for each severity group

Volume & Compliance by Shift

Patient volume (bar) and compliance % (number)

WHAT'S WORKING

- ESI 1** All 420 resuscitation-level patients received immediate care (100%). Zero patient safety events.
- ESI 2** All 1,022 emergent patients were seen within 10 minutes (100%). Critical pathway is intact.

NEEDS ATTENTION

- ESI 3** 17% of urgent patients (439 of 2,546) exceeded the 30-minute target. When they breach, they wait an average of 80+ min over target.
- Afternoon** Afternoon shift has the lowest compliance (58.5%) across all ESI levels, suggesting a staffing or capacity gap.

CRITICAL PRIORITY

- ESI 4** Only 12.1% compliance — 1,342 patients waited over 60 minutes. Afternoon ESI 4 is near-total failure: 98.8% breach rate.
- Trend** No improvement observed over the 3-month period. This requires a structural intervention, not incremental adjustment.
